

Electrical Appliances

Here's to new beginnings!

Pyramis Metallourgia A.E. is a Greek multinational company supplying integrated kitchen and bathroom solutions for domestic use. With over 60 years of expertise, Pyramis is among the top leading companies of the sector worldwide (production capacity of 1,500,000 stainless steel sinks & 170,000 composite sinks annually). Its international sales account for more than 85% of total company's turnover, with almost 97% of its production exported to 82 countries all over the world.

In 2022, in a brand new factory, at Oinofyta, Athens, Pyramis is redefining "Made in Greece" quality, incorporating the highest design and functionality standards, in creating new domestic appliances and seamless smart home experiences. In a changing and transforming world, there are timeless values connecting the past, present and future, defining a sustainable and practical daily life. At Pyramis, we support this connection by fostering an outward looking culture of excellence, continuous development and innovation.

Cookerhoods

Smooth design, minimal lines, fine quality and superior functionality are only some of the features of Pyramis cooker hoods.

The rest, come in a variety of types, sizes, colors and capacities in order to provide maximum results according to your needs. But all of them guarantee that the Pyramis cookerhoods provide a room free from odors and vapors. They work quietly but efficiently and they keep the aroma of the food on your plate and not all over the house.

Cookerhood Types

Pyramis cooker hoods offer an abundant variety of types: Standard hoods, sliding, integrated, chimneys, decorative hoods, islands... all made of quality materials to offer your kitchen the design and the performance it requires.

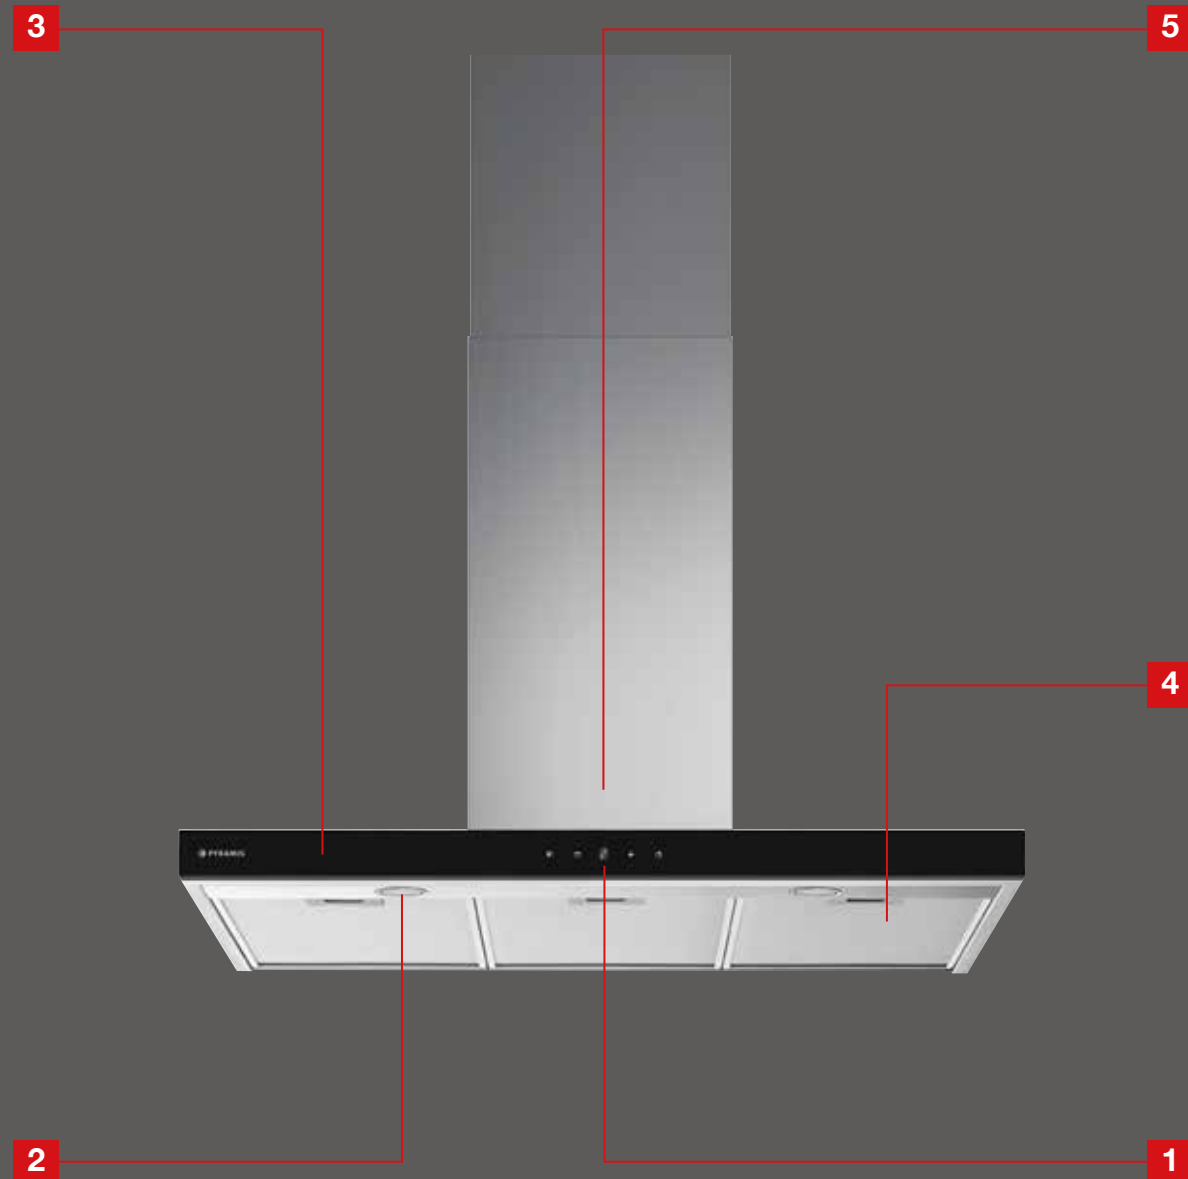

Abysso, a new experience!

Abysso is a unique solution for the kitchen, as it brings together an induction hob with a built-in cooker hood under the workbench. An evolution in both aesthetics and performance, it combines the perfect design and extraction capacity and starts a revolution in the cooking experience in an innovative way: an odorless kitchen with complete visual freedom.

Key Features

1
Device control

Touch control, functional push sliding or electronic buttons, ensure easy to use appliances and excellent aesthetics.

2
Lighting

The use of LED lighting ensures efficient & constant light flow, longer life cycle and energy saving.

3
Materials

Pyramis cookerhoods are offered in various materials and color combinations so that they can match your kitchen style. Glass, stainless steel or painted surfaces and their combinations are just some of the options that you can choose from.

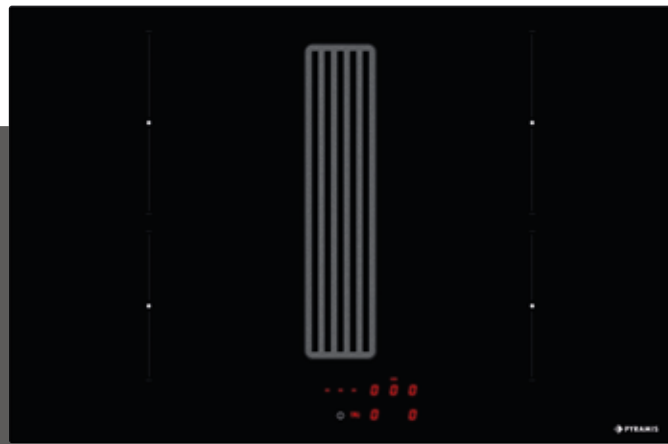

4
Metallic filters

They protect the inner parts of the cookerhood by preventing the absorbed grease from harming the fan or the motor and add to the aesthetics of the cooker hood. They are easy to remove and can be washed by hand, or in the dishwasher.

5
Carbon filters

Carbon filters recirculate the purified air back to your kitchen. They cannot be cleaned or repaired; they can only be replaced when necessary. Their saturation depends on the level and time of use, type of cooking and the frequency that the metal filters are cleaned.

Ovens

Pyramis ovens have been designed to make cooking as easier and as quicker as possible in order for you to have more time to spend with whatever you love the most.

Cook without compromises and enjoy a tasteful result. The smart as well as the basic functions of Pyramis ovens will come up to the task, either you're a professional mastechef or an inexperienced learner.

They come in a variety of function combinations and styles but all with an extra large cavity of 73lt. Choose what best fits your needs and let yourself get creative in the kitchen, the results will sure amaze you!

Control

Full touch, high advanced with auto programs

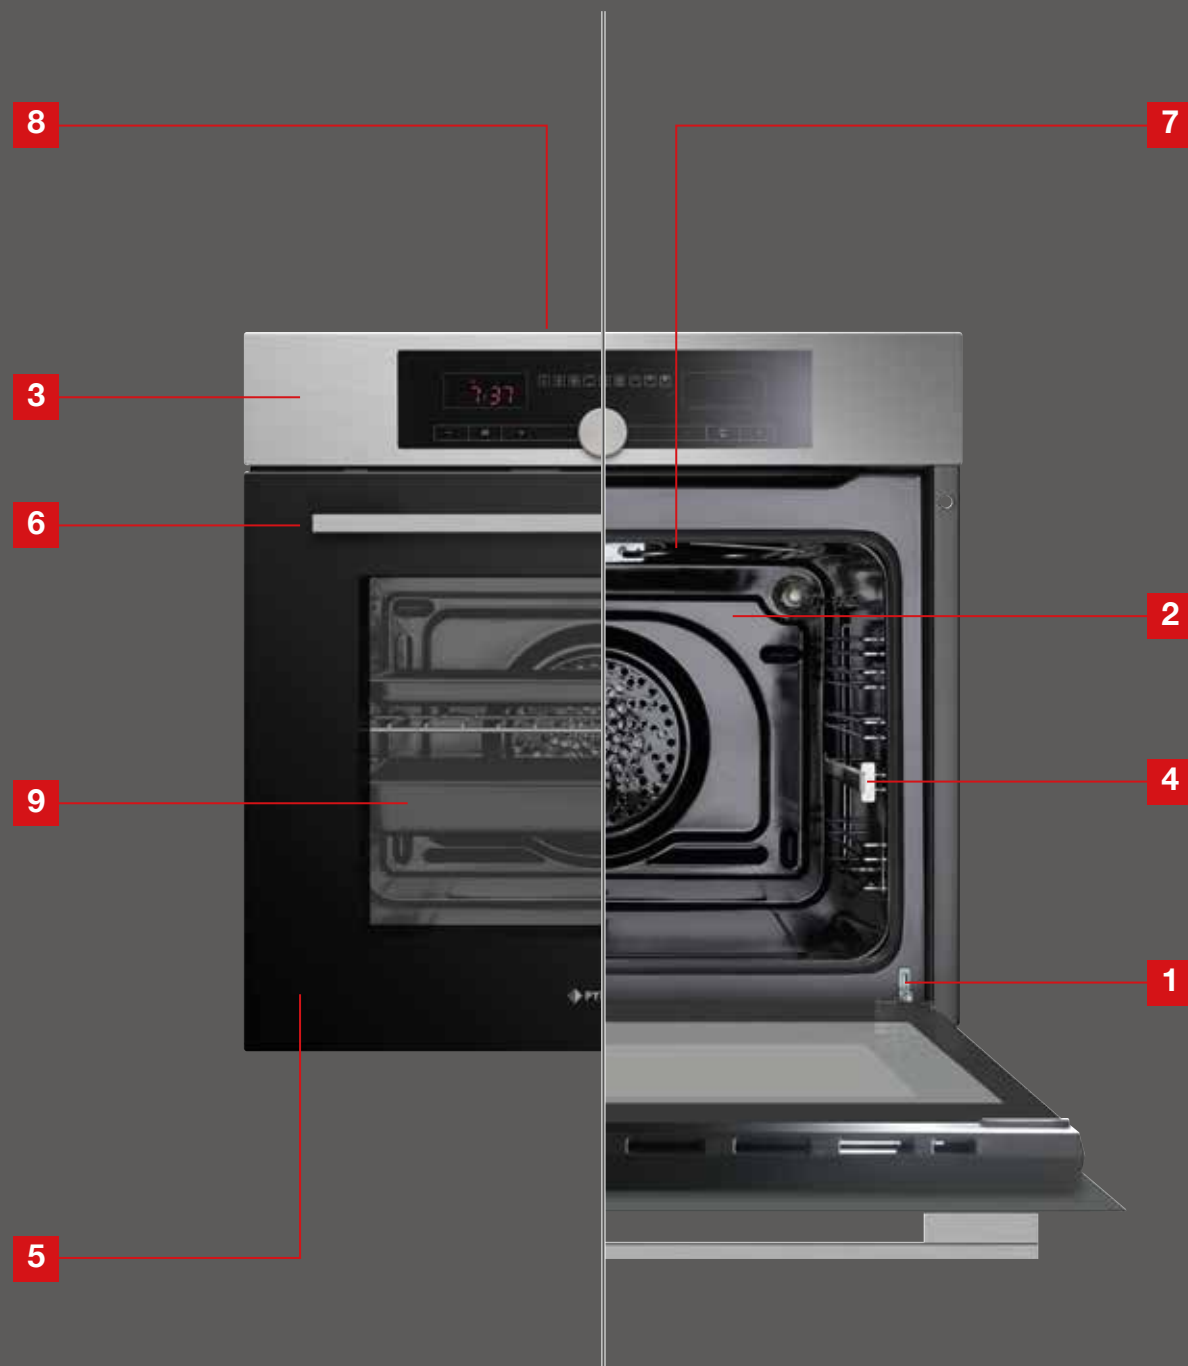

Touch control in combination with knobs

Mechanical controls with knobs

Key Features

Soft close door

Specially designed hinges, softly and quietly close the oven door with a gentle touch, reducing vibrations and noise.

Easy to clean enamelled cavity

The cavity of the oven is enameled with an extremely durable coating which provides additional insulation, while it does not absorb grease and food residues. Thus, the oven cavity is effortlessly cleaned.

Anti-spot surface

The coating of the external stainless steel surfaces prevents the formation of marks and stains from daily use, keeping them clean for a longer period of time.

Side racks / Telescopic rails

Side racks and telescopic guides make cooking easier and safer while maintaining the cavity intact from scratches.

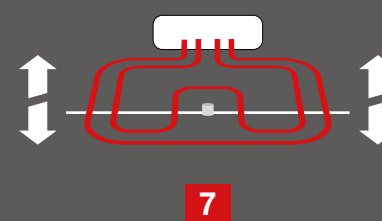

Double / triple glass door

They maintain heat inside the oven, optimizing energy consumption while keeping the outer surface of the oven door cool and safe. They are easily detachable for cleaning.

Door handles

High aesthetics, durability and ergonomic design are the key features of the new Pyramis oven handles.

Detachable grill

The upper heating element moves down with a simple touch, so the cleaning of the oven cavity becomes easier than ever.

Cooling system

The ventilation system cools the oven efficiently, maintaining the appropriate temperature both around the oven (cabinets) and at the front (door), ensuring maximum safety & efficiency.

Accessories

Large trays and grids (42x34cm) are provided with every Pyramis oven, for your every day cooking needs.

Hobs

Pyramis hobs offer a truly improved experience in cooking.

The refined design and the multitude of types, functions and sizes, ally with the latest developments in technology, and offer the perfect choice for every kitchen. Whether it is ceramic, induction or gas, Pyramis hobs guarantee efficiency and high standard quality in every day meal preparation.

Types

Ceramic

Induction

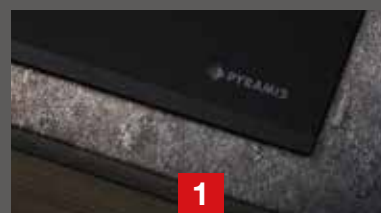

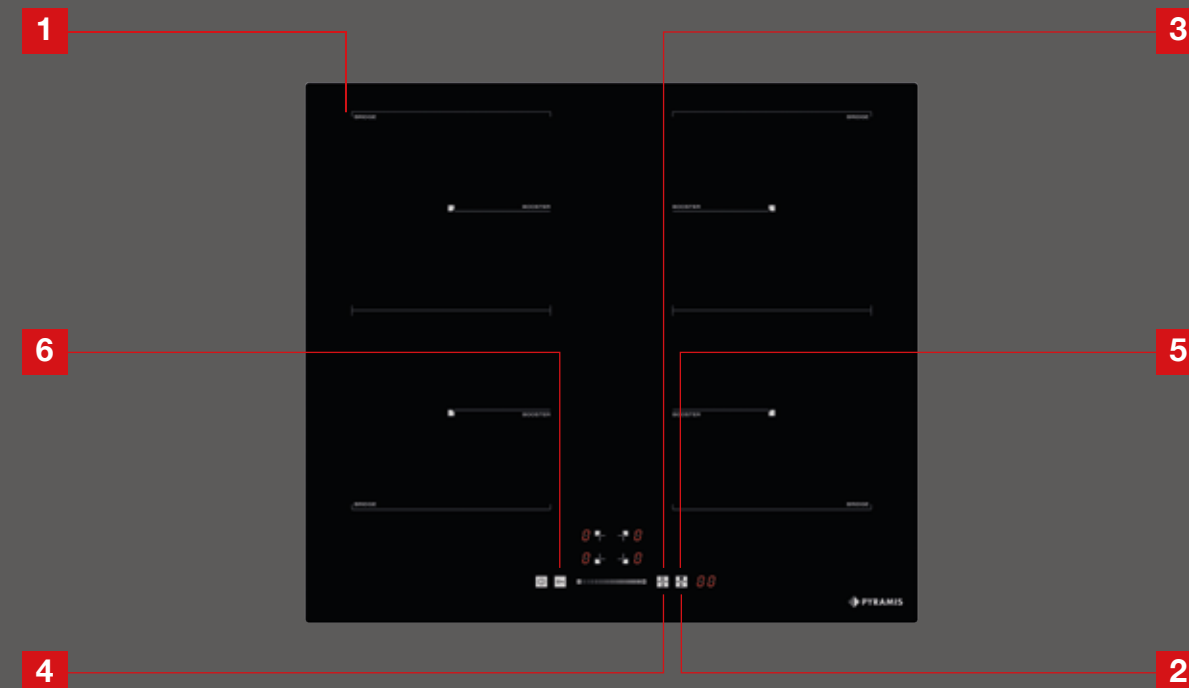

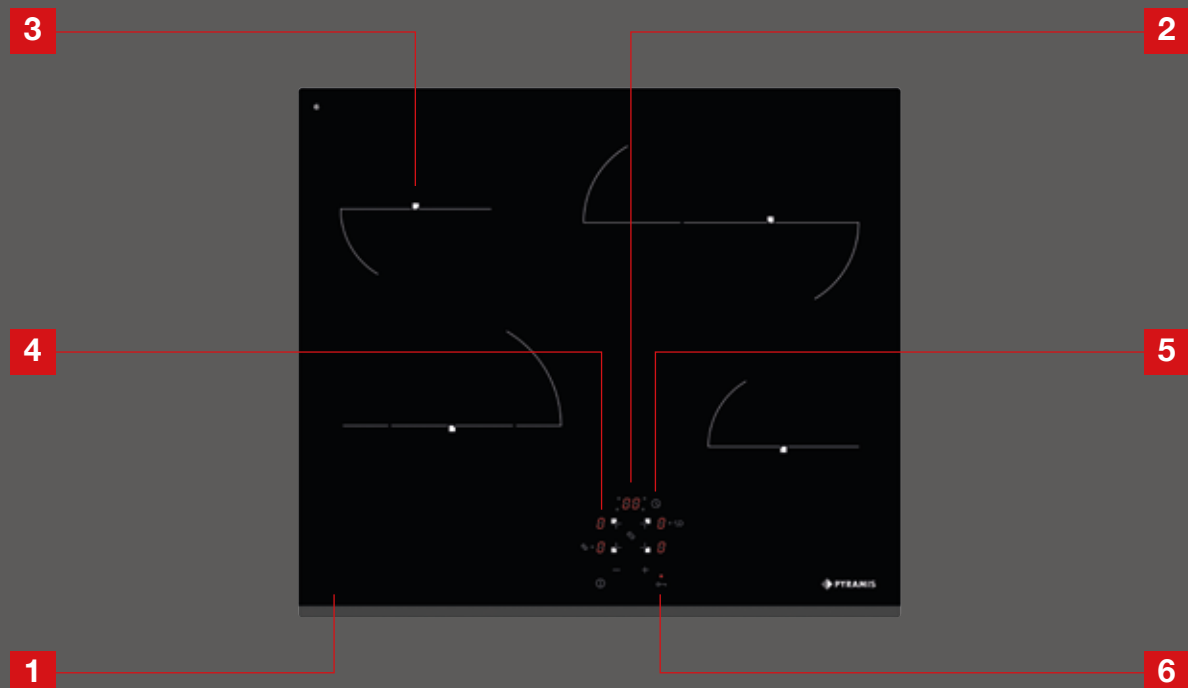

Gas

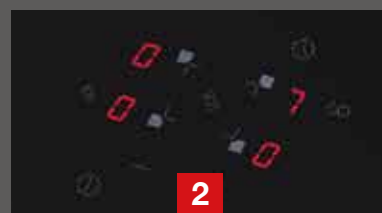

Ceramic Hobs

Induction Hobs

Hob profiles

Inox framed, frameless or beveled hobs that contribute to the style and determine the aesthetics of your kitchen.

Control

Use the high tech touch controls or rheostatic knobs to easily and safely operate your appliance.

Overflow safety device

OSD turns the hob off, in case of fluid overflow on the appliance's surface while cooking, ensuring maximum safety.

Bridge

The Bridge system allows you to join two cooking zones making cooking with larger pots and pans, very easy.

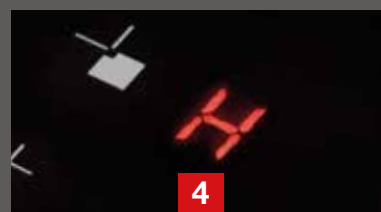

Pause function

The pause function stops cooking and continues with the same settings after the reactivation.

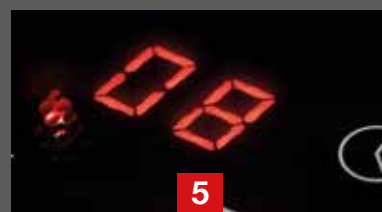

Booster zone

Speeds up the cooking time, providing a higher power level for 5 minutes straight.

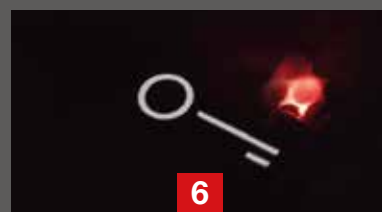

Residual heat indicator

A red digital indicator that warns that the relevant zone is still hot.

Timer

Automatically terminates the operation of the hob at the end of the desired cooking time.

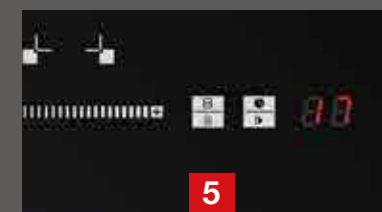

Safety lock

All hob functions can be locked to prevent accidental activation or child intervention.

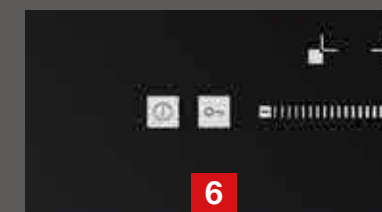

Keep warm

The Keep warm function keeps the food in constant temperature of 70 °C until serving time, while preserving its taste and freshness.

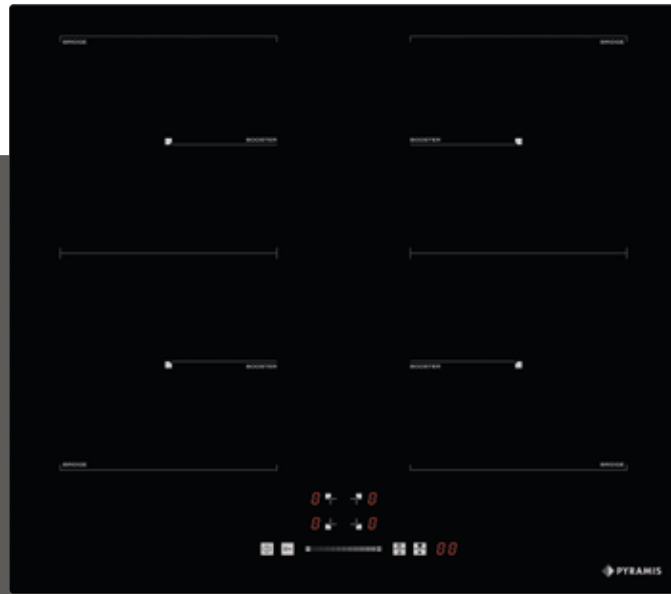

Individual cooking zone timer

The Individual cooking zone timer can be set for up to 99 minutes. The timer switches the hob off automatically when the selected time elapses.

Safety lock

All hob functions can be locked to prevent accidental activation or child intervention.
